

Patch installation instructions

NOTE: ALWAYS BACKUP THE HAZMATCOMMERCE DATABASE BEFORE APPLYING UPDATES.

Once you have downloaded the executable you must put it in the local drive of the SQL server where the HazmatCommerce database is located. Double click on the executable and the following dialog will appear.

1. Using the Server drop down select the SQL Server name where the HazmatCommerce database is located.
2. Select the authentication method supported by your installation. If you do not know which one to choose contact your network or database administrator for this information.
3. Click the Run button and then click 'Yes' when prompted to continue.
4. When the patch has been applied click 'OK' to finish the installation of the patch.
