

SQL 2005 HAZMATCOMMERCE DATABASE BACKUP INSTRUCTIONS

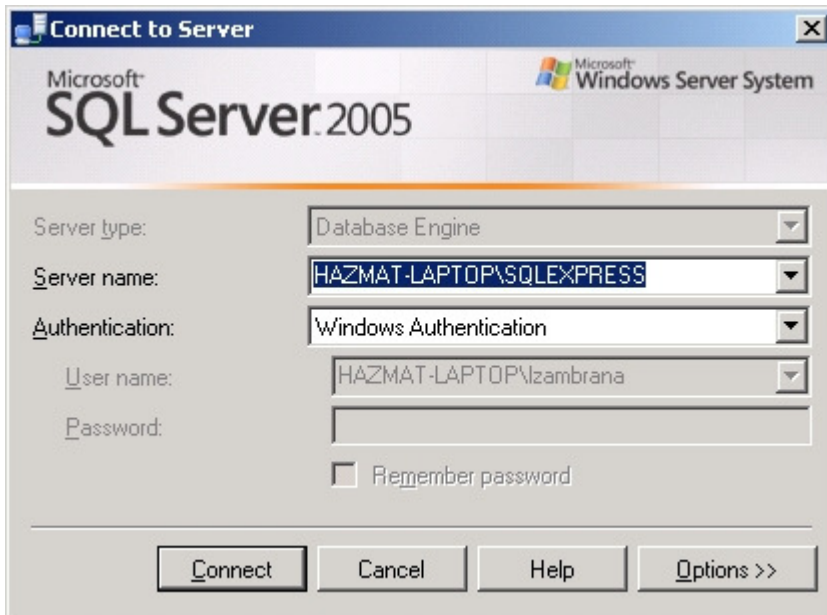

STEP 1

On the database server open SQL Server Management Studio or SQL Server Management Studio Express as shown below:

STEP 2

You will be presented with the Connect to Server dialog box shown below where you must select the type of Authentication needed to connect to the database server. Begin by selecting Windows Authentication and if you are not successful select SQL Authentication from the Authentication drop down. At this point you might have to contact your database or network administrator for the username and password of the SQL Server (sa) System Administrator. Once logged in continue to STEP 3.

STEP 4

If this is the first time you have backed up the HazmatCommerce database you must select the folder where the backup will be saved and the name of the file you will be giving the backup. Click the Add button on the lower right hand corner. If this is not the first time you will already have a file created for your backup and all you need to do is Click the OK button and continue to step 7 otherwise continue to STEP 5.

Back Up Database - HazmatCommerce
